Dune Ion Ceramic

Dune Ion Ceramic Irons are designed for professionals desiring to work with high-tech hairstyling tools that combine safety with quality and price.

Dune irons are made in South Korea, the country that invented the highest quality and safest irons on the market.

- The Dune Ion Ceramic offers 3 models of professional irons. All have nano-tourmaline/ion ceramic plate technology.
- Tourmaline, a mineral, naturally generates negative ions that coat the hair and neutralize static electricity, resulting in hair that's brilliant, soft and silky!
